# Innovation not Imitation

It is with great pleasure that we present the 2019 range of SpaceVac High-Level Cleaning Systems.

The expansion of our product line and continued improvements across the range for 2019 is testament to our ongoing commitment to absolute excellence in the field of high-level cleaning; while the new additions to our range demonstrate our clear directive to find new ways to innovate at every turn.

We are sure you will be as delighted in this new line of innovative new products as we are!

Be sure to book a demo of **SpaceVac** today and see for yourself how you and your team could be working higher, safer & faster!

Tommie Nisula  
CEO, SpaceVac International

# British Engineering. Global Issues.

**SpaceVac are the world's leading manufacturer of high-level vacuum cleaning and inspection systems. Our pioneering technology is revolutionising gutter cleaning, high-level interior and exterior cleaning and high-level inspection!**

The SpaceVac system was invented 10 years ago and since then, continuous research and development has led to a range of systems that are revolutionising high-level cleaning.

From our fully conductive ATEX systems, (the world's first ATEX certified high-level cleaning system, certified for use in explosive atmospheres) through to our wide selection of tools and accessories; the SpaceVac range – all featuring our market leading "Safety Locking Mechanism" – have been built with safety and quality at heart.

## **A Revolution in High-Level Cleaning:**

The origins of the SpaceVac system

lie in gutter cleaning. Recognising a gap in the market for a system that allowed operators to clean these areas from the ground floor, the system was developed and launched nearly a decade ago and has since seen nearly a decade of constant refinement and improvement, to create the world's leading high-level cleaning system.

## **The SpaceVac System:**

The system itself is made of up five distinct elements.

The first part is a unique **universal vacuum to hose cuff** that safely connects the SpaceVac system to your existing vacuum. (Please talk to our technical team for recommendations on appropriate vacuums)

The second part of the system is a range of **interlocking poles** that combine to a maximum height of 15 metres high. These lightweight carbon-fibre poles utilise our unique "safety locking mechanism" to stay together during operation.

These poles are then complimented with a full range of safety locked **cleaning tools** including lightweight durable cleaning heads for spiking

built-up debris, collecting material from gutters and even a range of brushes and tools for cleaning internal racking, ducting and vents.

Finally all SpaceVac internal and external (not ATEX) high-level cleaning systems come equipped with a **wireless camera and monitoring system** which enables users to see the progress of cleans in real time from the ground floor.\*

Finally our unique hose cuff mechanism allows for direct connection of tools for detail work where required.

## **A Market Leader for a Reason:**

Since its introduction, SpaceVac has won rave reviews from end users and facilities management companies alike for its technical abilities and robust long lasting construction.

**As our international expansion has continued, the system has continued to find new markets with businesses across a wide range of sectors and geographies winning awards from the likes of ISSA and Green World along the way!**

# SpaceVac Lite

Domestic  
Retail  
Office

The SpaceVac LITE cleaning system, is a lightweight, entry level version of our award winning high-level cleaning system; specifically designed for domestic and light commercial premises...

While cleaners and maintenance teams might vacuum floors and stairways as part of their regular weekly cleans, anything above eye level is often left uncleaned.

These areas however, are often a crucial part of building maintenance. With **SpaceVac LITE** you can easily:

- \* Reduce fire risk by removing dust from lights and cable trays thus preventing dust layer ignition and light fittings from overheating.
- \* Keep premises secure, by removing any debris obscuring CCTV and motion detector devices.
- \* Improve the health of occupants by removing the dust from vents that is disturbed and circulated when air conditioners are in use. Research has shown that removing this dust regularly can help to minimise respiratory complaints such as asthma.
- \* Keep pipework, ducting, vents and other high-level areas clear and clean ensuring premises look great all year round!

Made of durable lightweight materials, **SpaceVac LITE** also features our unique Safety Locking Mechanism to offer total operator safety during use.

While still built to the same exacting standards as the rest of the SpaceVac line and still retaining some of the crucial safety features [such as our safety locking mechanism] that our customers love; SpaceVac LITE has been developed to fit a very clear gap in the market for smaller cleaning

companies operating in the domestic and commercial space.

The system's **low cost** and **fast ROI**, means cleaning companies can quickly see a return by offering new services to their existing customers and marking out a clear USP over the competition.

Further; the system's simple to use nature and low operating weight means anyone can put **SpaceVac LITE** to work quickly and easily.

SpaceVac LITE and Small Round Brush - Office clean, Northampton [UK]

## SV38-LITE : 38mm Lite Kit

Each 38mm LITE Kit consists of the following items:

### Pole Kit:

**SV38/125-LITE**  
3 x 38mm x 1.25m  
LITE Pole

**SV/LPB**  
1 x Lite Pole bag

### Head Kit:

**SV38/32HA**  
1 x 32mm hose to  
pole adaptor

**SV38/90H**  
1 x 90 degree cleaning  
head

**SV38/85W**  
1 x small Flexi Brush

**SV38/SRB**  
1 x Small Round Brush

# SpaceVac Pioneer

Retail  
Commercial  
Education

PIONEER system in use with Backpack Vacuum. Car dealership, Essex, UK

The SpaceVac PIONEER cleaning system is a unique mid-range cleaning system that sits between the LITE system and the heavier duty systems found elsewhere in our 38mm Internal range...

The Pioneer system is a new addition to the SpaceVac range, designed to fill the gap between our budget friendly, entry-level LITE system and the bigger, more powerful systems available elsewhere in the range.

Reaching up to 9m in height from the safety of the ground floor, the Pioneer system has been designed for users looking for a little extra reach and functionality in their SpaceVac system.

While still built to the same exacting standards as the rest of the SpaceVac line and still retaining some of the crucial safety features (such as our safety locking mechanism) that our customers love; the Pioneer is a complete cleaning solution to add on to any existing vacuum cleaner.

The system comes complete with full pioneer pole set, hose and cuff set and a range of cleaning tools and

accessories including multiple angled heads to provide reach and access into even the hardest to reach areas - as well as a range of tools and brushes.

The development of this system enables cleaning companies and facilities managers to quickly and efficiently clean inaccessible areas with minimal operating footprint. Often paired with a backpack vacuum, the inobtrusive working method along with our fast cleaning method means that maintenance can be carried out with minimal disruption to workers and other inhabitants.

# SV38-PIONEER : 38mm Pioneer Kit

Each 38mm Pioneer Kit consists of the following items:

## Pole Kit:

**SV38/16-Classic**  
3 x 38mm x 1.6m  
classic pole

**SV38/08-Classic**  
1 x 38mm 0.8m Classic  
half pole

**SV/PB**  
1 x Pole bag

## Head Kit:

**SV38/85W**  
1 x 8" Flexi Brush

**SV38/FLT**  
1 x 300mm Flat Surface  
Brush

**SV38/SRB**  
1 x Small round Brush

**SV38/135H**  
1 x 135 Degree Cleaning  
Head

**SV38/90H**  
1 x 90 Degree Cleaning  
Head

**SV38/45H**  
1 x 45 Degree Cleaning  
Head

## Hose Kit:

**SV38/3H**  
1 x 3m Hose

**SV38/HA**  
1 x Pole to Hose Adap-  
tor

**SV38/50HC**  
1 x 38mm Hose to Vac  
Cuff

**SV/HB**  
1 x Hose Bag

# SpaceVac Internal Cleaning

The SpaceVac Internal high-level cleaning system is a revolution in high-level cleaning.

**Our Internal Cleaning System provides operators with a safe and easy way to clean high-level areas up to 20m high from the safety of the ground floor.**

By helping operators to reduce the build up of dust, dirt and other materials above head height, SpaceVac improves not only the cleanliness of internal areas but improves the health of occupants, and the overall safety of the building by lowering the risk of fire and increasing the efficiency of crucial apparatus such as air-conditioning, security cameras, fire alarms.

stores and shopping centres, cinemas, museums and many other environments with high-level areas requiring cleaning.

The 2019 line of SpaceVac systems sees a number of new additions to the internal line with the launch of the new **PIONEER** system for use in light commercial settings and the launch of our new **PRO** and **ULTRA** 38mm poles. The result of extensive research and development, these new systems utilise new carbon technology to offer improved robustness and rigidity -both designed for advanced users looking to clean at higher heights and dealing with heavier duty materials.

Since launching onto the market in 2008, the SpaceVac Internal System has been a popular choice for cleaners and facilities managers working across a range of sectors including airports, theatres, schools, office buildings, retail

**Our complete Internal Range features a number of options for pole kits. Compare the options to find your ideal solution using the table below:**

	Lite	Pioneer	Classic	Pro	Ultra
Pole Diameter:	38mm	38mm	38mm	38mm	38mm
No Of Poles:	3	3	5	7	9
Half Pole Included?	N	Y	Y	Y	Y
Pole Length:	1.25m	1.6m	1.6m	1.6m	1.6m
Max Reach:	3.75m	6.2m	8.8m	13.4m	15.2m

**Please note: additional poles can be purchased to reach extra heights.**

# Internal Pole Kits:

Spacevac offer 3 options for Internal cleaning pole sets:

## 38mm Classic

**SV38/16-Classic**  
5 x 38mm x 1.6m  
classic pole

**SV38/08-Classic**  
1 x 38mm 0.8m Classic  
half pole

**SV/PB**  
1 x Pole bag

## 38mm Pro

**SV38/16-Pro**  
7 x 38mm x 1.6m Pro  
pole

**SV38/08-Pro**  
1 x 38mm 0.8m Pro half  
pole

**SV/PB**  
1 x Pole bag

## 38mm Ultra:

**SV38/16-Ultra**  
9 x 38mm x 1.6m Ultra  
pole

**SV38/08-Ultra**  
1 x 38mm 0.8m Ultra  
half pole

**SV/PB**  
1 x Pole bag

“The Church hasn't looked so good in years - definitely something of a revelation”

Michael Macey, St Johns, Boxmoor

SpaceVac Internal system in action, Hemel Hempsted [UK]

Once you have selected your pole set, each SpaceVac Internal cleaning system comes equipped with the following:

### Hose Kit:

**SV38/5H**  
1 x 5m Hose

**SV38/HA**  
1 x Pole to Hose Adaptor

**SV38/50HC**  
1 x 38mm Hose to Vac Cuff

**SV/HB**  
1 x Hose Bag

### Head Kit:

**SV38/8SW**  
1 x 8" Flexi Brush

**SV38/15SW**  
1 x 15" Flexi Brush

**SV38/FLT**  
1 x Flat surface brush

**SV38/12DB**  
1 x 12" Ducting Brush

**SV38/5RB**  
1 x Small round brush

**SV38/45H**  
1 x 45 degree cleaning head

**SV38/90H**  
1 x 90 degree cleaning head

**SV38/135H**  
1 x 135 degree cleaning head

**SV38/STR**  
1 x Straight head

**SV/MB**  
1 x Mesh Bag

### Camera Kit:

**SV/CAM**  
1 x Camera

**SV/MON**  
1 x Monitor

**SV/CC**  
Camera Clip

**SV/MC**  
1 x Monitor Clip

**SVCAM/CAR**  
1 x Car Charger

**SVCAM/USBCHARGE**  
1 x USB Charger Cable

**SVCAM/SPLITTER**  
1 x Splitter Cable

**SVCAM/USB**  
1 x USB Data Cable

**SVCAM/CB**  
1 x Camera Bag

Check out our accessories section to find a range of tools and add-on's to the SpaceVac Internal Cleaning system

## Case Study: Ikea Stores [Sweden]

SpaceVac's Internal cleaning system was the perfect choice when Swedish retailer Ikea were looking for a high-level cleaning solution...

Historically, the FM team onsite had to clean the myriad of high-level installations in-store as well as built up dust in the myriad of overhead cable trays found in all of the stores.

When dust built up in these trays, the cables were not able to cool sufficiently, and as a result - the built up dust became a fire hazard which required regular cleaning.

Previously, to perform this work, a 2 man team utilised a hydraulic platform on wheels to clean small areas at a time. Each time cleaning, before dismantling, moving and starting the whole process again. On a large scale the work quickly became time consuming and expensive.

SpaceVac enabled one man to clean the same area much faster with less impact on the rest of the store.

Requiring just one person to operate and occupying a very small amount of space, the system allowed operators to clean quickly and efficiently - navigating their way quickly through the store.

In addition, the range of tools and brushes at the operators disposal meant they always had the perfect tool to reach even the hardest to reach areas - all from the safety of the ground floor.

As a result of successful trials, the system was adopted across Sweden in all Ikea properties and the correct implementation of SpaceVac and our high-level cleaning technology is now a standard, mandated part of IKEA's Facilities Management plan across Sweden.
